ADVANTAGES

- Holds a real tee
- Allows for a true natural swing
- Provides a divot feel with no club bounce
- Used by PGA professionals, teachers, tour players, and numerous top rated facilities
- Drastically improve your golf game
- Allows for play and practice year round
- Saves your grass and your money
- Available in mats and full tee lines

BENEFITS

This is a non-infilled high grade polypropylene yarn system designed for heavy traffic tee lines, hitting mats and extended use golf ranges. This product is used by many of the top golf courses in the U.S. This product holds a real tee and allows players to hit all clubs, from wedge to driver. EZTee® Hybrid does not replace real grass. Instead, it is an alternative to use to give grass time to heal properly. This product can be installed indoors or outdoors on concrete or a compacted aggregate base.

It is the policy of Synthetic Turf International to continuously improve their line of products. Therefore, Synthetic Turf International reserves the right to change, modify or discontinue systems, specifications and accessories of all products at any time without notice or obligation to purchaser. These are standard specifications subject to manufacturing tolerances and consumer requests.
